Note: Refrigerant leakage contributes to climate change. Refrigerant with lower global warming potential (GWP) would contribute less to global warming than a refrigerant with higher GWP, if leaked to the atmosphere. This appliance contains a refrigerant fluid with a GWP equal to 675. This means that if 1 kg of this refrigerant fluid would be leaked to the atmosphere, the impact on global warming would be 675 times higher than 1 kg of CO2, over a period of 100 years. Never try to interfere with the refrigerant circuit yourself or disassemble the product yourself and always ask a professional.

		SEER:	6.6
	Cooling mode	Energy efficiency class:	A++
		Pdesignc:	2.5KW
		Energy consumption based on standard test results. Actual energy consumption will depend on how the appliance is used and where it is located.	<b>132</b> kWh per year
		Climate type:	Average heating season
